

Enhanced eKEY™ application for BlackBerry® available on June 20 *Updated application improves productivity for BlackBerry users*

The enhanced eKEY for BlackBerry application is available for download on June 20, 2011.

New users, turn your smartphone into your lockbox key and also gain productivity tools. Bring the power of Supra's real-time information system directly to your phone! eKEY is also available for Android™ and iPhone® users.

Current users, begin immediately enjoying these upgrades and more:

- Sort profiles, that are downloaded for quick-search, by client name (eKEY Professional version)
- Experience improved keyboard operations for the BlackBerry 6 operating system
- Obtain correct SecureKEY numbers every time if you use the Clarity token
- Type listing ID quickly because searches are no longer case-sensitive

Supra is sending an email to current users of the eKEY application for BlackBerry. You can click on the link to download the application directly onto your phone. Alternatively, you can download the upgraded application directly from your phone at www.ekeymobile.com. The link can only be seen and downloaded from the BlackBerry itself, not from your computer.

Our Supra team is pleased to bring you these enhancements, and we encourage your feedback and suggestions.

Sincerely yours,

The Supra Team
