

Supra's enhanced eKEY® Professional application is available on May 6, 2011 to bring powerful mobile tools to real estate agents

Supra's eKEY Professional application brings new mobile tools to more smartphones than ever, so you can harness the power of real-time information.

Download eKEY from your app store to gain:

- Fast MLS searches with easy-to-save custom search criteria
- Larger rosters with fast text search
- Significantly more MLS data stored on your phone
- A preview of operations in Demo mode before you sign up for service

Keep the latest listing and showing information at your fingertips because eKEY updates itself through your phone's Internet connection. You can show listings at a moment's notice; answer client questions quickly; and know right away who is showing your listings so you can follow-up while it's still fresh in the buyer's mind. You can even turn your phone into a lockbox key – all with the eKEY Professional application on your smartphone.

Explore eKEY Professional and what it can do for you at www.ekeyprofessional.com.

Download the application and get a preview of its operations through the Demo mode. When you're ready to use eKEY, just ask your board to upgrade your level of service in their SupraNET system. Get your application from:

Android™

Download eKEY for Android directly from the Android Market at <https://market.android.com/details?id=com.utc.fs.ekey>.

The eKEY for Android User's Manual is available at:

<http://www.utcssecurityproducts.com/Site%20Assets/ekey-android-uman.pdf>
